Education

Darshan University

B.Tech in Computer Science Engineering – 8.45 CGPA

May. 2023 – May 2027

Rajkot, Gujarat, India.

Experience

White Label Fox

Software Engineer Intern

April 2025 – August 2025

Rajkot, Gujarat

- Developed full-stack web applications including an E-commerce platform and an OTT streaming platform using MERN stack, Redux, MySQL, and TypeScript, following modular and layered architectural patterns.
- Optimized React applications using **memoization**, **state normalization**, **lazy loading**, and **render optimization techniques** to enhance performance and maintainability.
- Implemented production-grade **authentication** and authorization mechanisms using **JWT access & refresh tokens**, **RBAC**, input validation, **rate limiting**, and structured logging, ensuring secure and maintainable backend services.
- Applied performance and scalability best practices by optimizing database queries, implementing **pagination and filtering**, designing stateless RESTful APIs, and aligning with industry-level backend practices.
- Built responsive, reusable, and accessible user interfaces using React, Tailwind CSS, Material UI, and Radix UI, leveraging a component-driven and design-system-oriented approach.

Projects

OTT Streaming Platform | MERN Stack, Redux, Tailwind CSS, JWT – [Github](#)

June 2025

- Built a full-featured OTT streaming platform using MERN stack, Redux, Tailwind CSS, and modern UI libraries, supporting **JWT-based authentication**, **RBAC**, and **multi-profile user accounts** with separate watchlists and personalized content per profile.
- Developed an admin dashboard with role-based access, enabling administrators to add, update, and manage movies, actors, and genres through dedicated collections, along with configurable platform settings to dynamically control hero section content (e.g., most searched, newest releases).
- Implemented **personalized content delivery** by **tracking user watch history** and **preferences**, prioritizing recommendations based on viewing behavior (e.g., action-focused recommendations for action-heavy users), along with advanced filtering, search, and category-based discovery.
- Enhanced performance and reliability by integrating file **uploads with Multer**, schema validation using Joi, **lazy loading** and client-side **pagination in React**, and modular backend design to ensure scalability and maintainability.

ATSify | MERN Stack, TypeScript, Redux, Tailwind CSS, JWT, Llama AI SDK

Frontend: [GitHub](#) | Backend: [GitHub](#)

November 2020

- Developing an AI-powered resume analysis platform that **evaluates resumes** against provided job descriptions and roles, extracting structured insights to highlight skills, experience, and role fit, with performance-aware frontend and backend design.
- Implemented secure and maintainable backend services using Express, JWT authentication, structured logging, **rate limiting**, file uploads with Multer, and schema validation with Zod, following industry-level folder architecture and backend optimization practices for scalability.
- Built a responsive, user-friendly frontend with React, Tailwind CSS, Redux, and Acenternity UI components, enabling seamless resume upload, **analysis visualization**, and interactive user experience, while applying React optimization techniques like lazy loading, **memoization**, and efficient **state management**.
- Integrated **AI capabilities** using **Llama AI SDK**, providing intelligent parsing and scoring of resumes, with modular architecture.

Technical Skills

Languages: Java, JavaScript, TypeScript, C
Frontend: React, Redux, Next.js, Tailwind CSS, HTML, CSS, Framer Motion
Backend: Node.js, Express.js, Next.js, Nest.js
Databases: MongoDB, MySQL, PostgreSQL, Redis
Others: Git, MonoRepo, TurboRepo, Docker, Jenkins

Leadership / Extracurricular

- Ranked** in the **top 13% globally** in LeetCode contests. - [link](#)
- Technical Lead**, University Programming Club – Led a team of 6 members, organized 8+ **technical events and workshops**, and managed event websites improving student participation and engagement.
- Teaching Assistant** for Data Structures and Web Technologies
